## SOLIS TRACTOR + SOLIS RMB PLOUGH

### Year on Year Cost Savings (In Field Operations)

Tractor Operation (in Hrs)	750
Average Diesel saving/ Hour (in L)	0.5
Total Diesel Saving (in L)	375
Cost of 1L diesel (in Rs.)	65
Savings in Diesel per Year	24,375
Savings in Diesel (5 Years)	<b>1,21,875*</b>

\*The total cost saving will depend on the soil condition and tractor performance.  
\*Taxes and Dealers apply.

### Tractor Qualifiers Driving Savings

- Saving of nearly 0.5L/Hr in Plough
- More depth and better pulverisation as compared to competition
- Highest Lift capacity in segment
- High power and better fuel efficiency at operating RPM
- Highest segment PTO HP
- More depth than competition due to E3 Engine

## Mounted Reversible Plough

Up to 30% Fuel Save

More Coverage Less Time

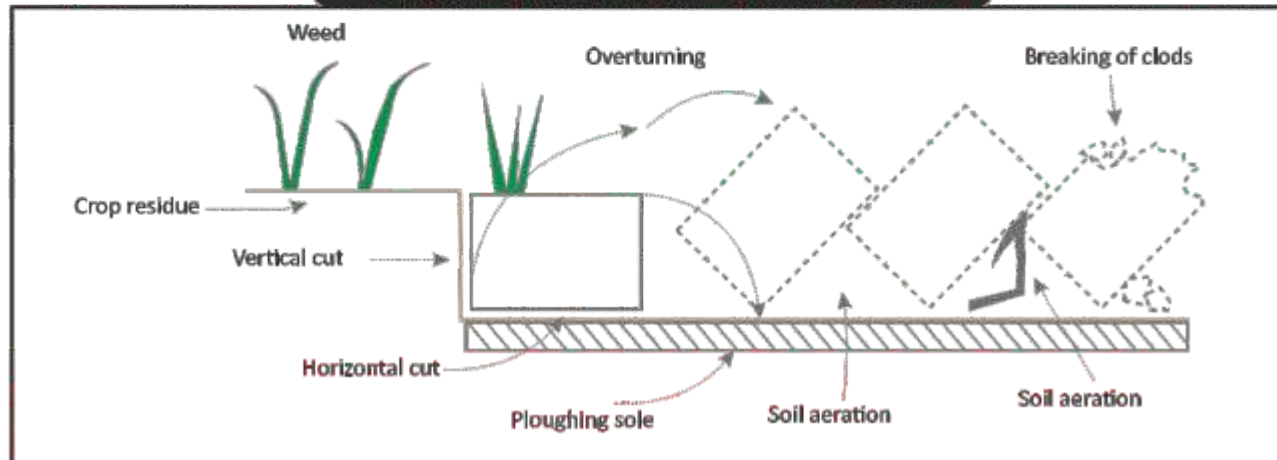

Less Maintenance

- ◀ Height adjustable drawbar
- ◀ Adjustable working depth
- ◀ Widest working width
- ◀ Reliable turnover mechanism

Solis Agri Solutions ingeniously tailored Reversible M.B. Plough to meet the tillage need of Indian farmers and improve accuracy of tillage on field. Our endeavour in R&D has amalgamated latest technology and innovation to bring world class product for Indian farmers.

### FUNCTIONALITY OF MB PLOUGH

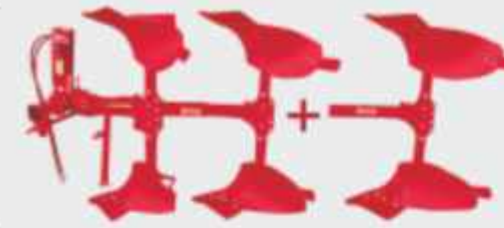

The reliability of Solis M.B. Plough with excellent on field output makes it a perfect primary tillage implement for farmers. M.B. Plough loosen the soil making it aerated for better crop growth. Its perfect design can invert furrow soil 180° for a ideal soil inversion our mould board made of boron steel having 8mm thickness can work upto 18 inch depth.

Solis M.B. Plough has a distinct "Easy Set" parallelogram linkage system design for quick & easy setting which improve tillage accuracy on field.

**Easy to adjust ...Easy to handle.**

## WHY CHOOSE SOLIS RMB PLOUGH

- Better soil inversion & soil aeration.
- Reliable hydraulic control helps to switch left & right bottom easily.
- Suitable to use in rocky & rooted areas.
- Unique profile cut tines works perfectly in all type of soils.
- Less maintenance & enhance productivity.
- The plough has special wear resistant steel blades with bar point for toughest ploughing job.
- Additional furrow can be easily added and repositioned for extra clearance.

### 2 MB & 2 + 1 MB configuration

Solis Reversible Plough is available as 2 bottom and 3 bottom variant. 2MB Plough can be converted to 3 MB Plough by adding a additional third body. The third body is available separately for retro fitment.

Suitable for all tractor models between 60 HP. to 90 HP.

### Robust head stock

Head stock designed to make the plough robust and provide stability which is best in class.

The Low and high point draw bar position, optimizes the ground clearance while lifting the plough.

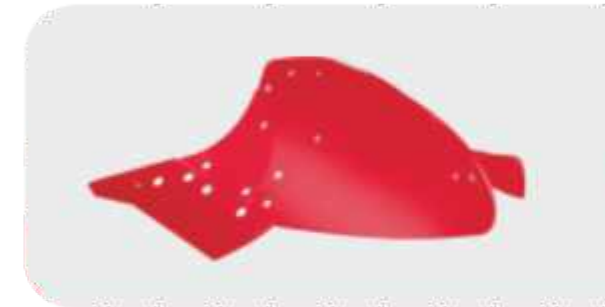

### Reliable turnover mechanism

Reliable & long lasting hydraulic turnover mechanism ensures effortless switching left & right bottoms at the end of rows.

### Precise adjustment mechanism

Precise adjustment mechanism allows easy & efficient adjustment of front furrow width & tractor pull line, independently of each other. Lateral forces are eliminated in easier way with this Precise adjustment mechanism.

### Reversible share point

There is no worry on wear & tear of share point after long hour of usage. As the share point can be reversed to be ready for ploughing again. Saves time and uninterrupted ploughing.

### Over load safety

In case of over load of blockade on mould board during ploughing is taking care by share bolt. Which protects the plough from any damage. Hassle free works and less maintenance.
